

AI-POWERED HCC CODING SMARTER RISK ADJUSTMENT STARTS HERE

QBotix
AI-Powered. People-Focused.

Healthcare organizations need accurate coding, strong documentation, and efficient workflows. **CoderAI by QBotix** combines AI intelligence with human expertise to transform HCC coding and risk adjustment.

WHAT IS HCC CODING?

HCC (Hierarchical Condition Category) coding assigns risk to patients based on documented conditions. Accurate HCC coding helps organizations:

Better understand patient health risk

Improve risk adjustment accuracy

Support appropriate reimbursement

THE CHALLENGE OF MANUAL REVIEW

Manual chart review is time-consuming and complex. Coders must:

- Review large volumes of documentation
- Identify chronic and acute conditions
- Look for missed HCC opportunities
- Validate supporting documentation
- Review ICD-10-CM codes
- Evaluate risk adjustment opportunities
- Document coding decisions
- Prepare for audits

HOW AI MAKES A DIFFERENCE

AI analyzes large volumes of clinical documentation

Identifies patterns and surfaces potential HCC conditions

Highlights relevant clinical evidence & coding opportunities

Prioritizes charts that deserve the most attention

Coders review, validate and make the final decision

AI FINDS. HUMANS VALIDATE.

The perfect partnership for accurate, compliant, and audit-ready HCC coding.

KEY BENEFITS OF CODERAI

IDENTIFY POTENTIALLY MISSED HCC CONDITIONS

Surface conditions that may be documented but not captured.

REDUCE MANUAL CHART REVIEW

Spend less time searching and more time applying expertise.

IMPROVE CODING EFFICIENCY

Process charts faster and improve overall productivity.

SUPPORT RISK ADJUSTMENT OPTIMIZATION

Capture a more complete picture of patient risk from existing documentation.

STRENGTHEN AUDIT READINESS

Maintain consistent, well-documented coding decisions.

EMPOWER CODING PROFESSIONALS

AI handles the heavy lifting so coders can focus on what matters most.

THE FUTURE OF RISK ADJUSTMENT IS INTELLIGENT

AI-powered HCC coding automation helps ACOs and healthcare organizations work smarter, reduce manual effort, and ensure every patient's risk is accurately represented.

Smarter technology. Stronger insights. Better outcomes.

READY TO TRANSFORM YOUR HCC CODING WORKFLOW?

Discover how CoderAI by QBotix can help your organization improve efficiency, identify more HCC opportunities, and support better risk adjustment.
