

Introducing **CoderAI** – Qbotix's HCC Coding **Automation** Tool

Accurate **HCC coding** and risk adjustment are critical for ACOs and healthcare organizations to ensure proper reimbursement and compliance. Yet, manual chart reviews can be time-consuming and prone to missed opportunities.

That's where CoderAI by Qbotix makes a difference.

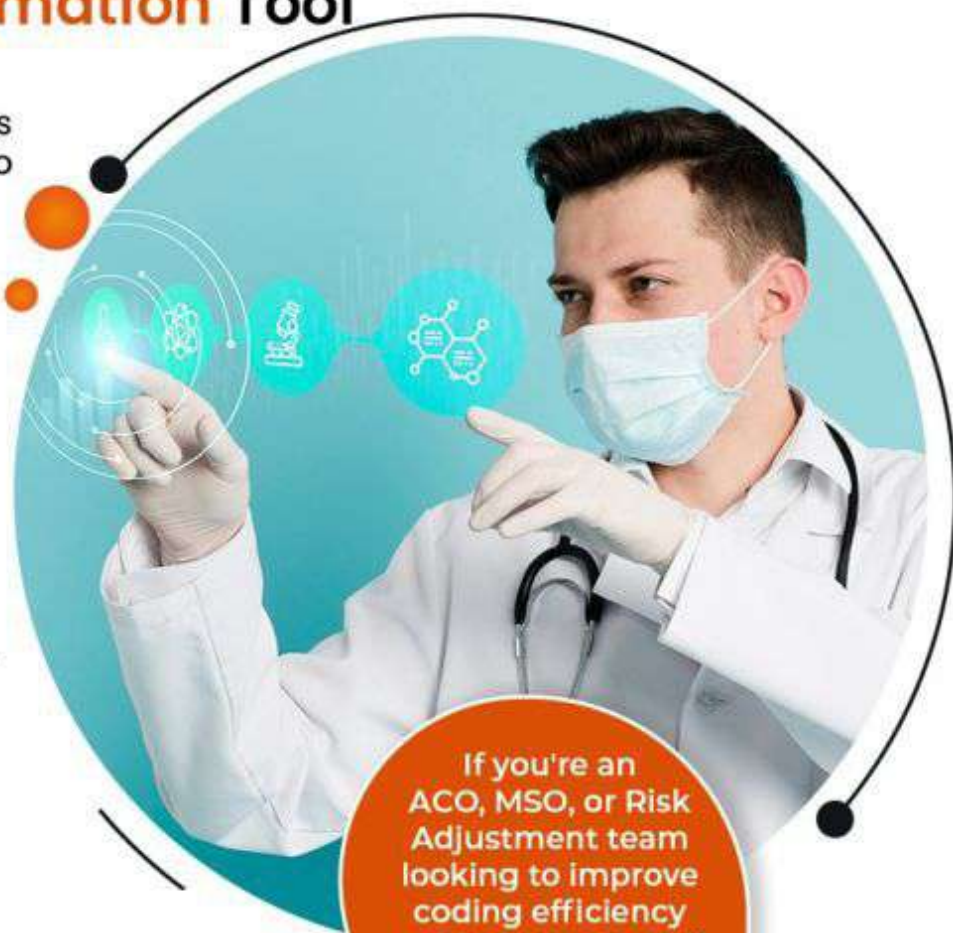

CoderAI helps organizations:

- ✓ Identify missed HCC conditions from clinical documentation
- ✓ Automate chart review workflows and reduce manual effort
- ✓ Improve coding accuracy and RAF score optimization
- ✓ Enable faster turnaround for coders and auditors
- ✓ Maintain compliance and audit readiness

With intelligent automation and advanced analytics, CoderAI empowers coding teams to focus on what matters most—accuracy, efficiency, and better risk adjustment outcomes.
